Foster+Partners Industrial Design

Description

The Cordoba Outdoor armchair combines precise design, ergonomics, comfort and environmental responsibility. The frame is in natural teak wood, particularly suitable for the outdoor dimension. The backrest and the seat are covered with a reinforced canvas made of polypropylene, characterized by an incredibly pleasant rough touch, reminiscent of a natural fabric in every way. To emphasize the harmonic and relaxed image of the armchair, the covers are offered in colours inspired by nature. To allow convenient maintenance of the structure, the coverings can be easily removed when needed. A choice that also represents the desire to move in the direction of an increasingly responsible design. All the components of Cordoba Outdoor, at the end of the life cycle of the product, can be separated and disposed of following the path most suitable for each material.
